J	<p>Read the following passage :</p> <p>Billions of years ago, bacteria were some of the first living things on Earth. Bacteria are microbes that live everywhere and there are many different types. Some bacteria make us sick, and some are very useful. Bacteria can eat almost anything. Some feed on waste, some eat oil, and some eat the food between people's teeth! Bacteria are many different shapes. Some are like rods, some are like balls, and some are curly. Some have flagella that look like tiny hairs. These move in different directions to help the bacteria to move around.</p>  <p>39. What are bacteria? 40. How different are bacteria? 41. Bacteria were the only living things that existed billions of years ago. True <input type="checkbox"/> False <input type="checkbox"/> 42. Some bacteria eat people's teeth. True <input type="checkbox"/> False <input type="checkbox"/> 43. In some bacteria, there are very small hairs called..... 44. These hairs make it possible for bacteria to.....</p>	4
