### C) Reading Comprehension

**Read the following passage and then answer the questions.**

My name is Lindsey Frost. You can see that my grades are only average if you have a look at my high school records. But grades do not tell the whole story about a person's abilities. Some people who are geniuses probably don't do well in school at all. I believe that there are different kinds of intelligence and not all of them are measured in school. My intelligence lies in my communication skills. I am really good at getting people to talk to me, and it just happens naturally. People have always wanted to share their thoughts and feelings with me. And when I talk, people listen. People tend to come to me for advice, and they take the advice that I give them. It usually turns out to be pretty good advice, too.

I am able to get along with most people, and I believe that it is because of my natural communication skills. If I have a problem, or if I am anxious, I am able to talk about it. I don't keep my feelings inside. I think a lot of people like the way how I communicate with others. My dream is to use my intelligence to help people. In the future I would like to be a school psychologist and help students solve problems they have at school or at home. This school offers one of the best psychology programs in the country. I know that I can achieve my goal by combining my skills with an education from this school.
